

SERIES TCR

TUBE CLAMP REPLACEMENT

Increased Technician Productivity through Innovation

- Allows Replacement of the One or Both Side Plates instead of the entire Clamp Assembly, Reducing Your Maintenance Costs and Down Time.
- Perfect Alignment & Tighter Hold on Tight Weld Areas Increases Productivity by Reducing Bad Welds and Alignment Time.
- Simple, Easy to Install Replacement Parts Allow Technicians to Carry the Necessary Parts to Keep a Weld Head Running. Downtime is Minimized as Worn Clamp Assemblies are Quickly Serviced in the Field.
- Designed as a Drop In Replacement for the ARC Machine 9-500 Weld Head Clamp Assembly.
- All Plates on a TCR Assembly are Replaceable to Change the TCR Assembly to either 1/4", 3/8" or 1/2".
